

CAPABILITY BROCHURE

In an era defined by climate change, pollution, and resource scarcity, sustainable infrastructure is not optional—it's a necessity. Enveng Group delivers strategic sustainability advisory and consulting services that drive measurable environmental improvements, enhance operational efficiency, and create enduring value for infrastructure projects and organisational performance.

As certified Infrastructure Sustainability Accredited Professionals (ISAPs), our team is equipped to implement and support projects through the Infrastructure Sustainability (IS) rating process under the IS scheme. From initial assessment to full rating submission, we assist clients in identifying opportunities to reduce energy, water, and waste, while improving ecological protection and embedding sustainability outcomes into every stage of project development, aiding your project in achieving the IS rating that you are aiming for.

Our Sustainability Services Include:

- Business-Wide Sustainability Strategy.
- Sustainability Policy Development.
- Ecologically Sustainable Design (ESD) Strategy.
- Renewable Energy and Carbon Emission Solutions.
- Energy, Water, Carbon, and Waste Reduction Initiatives.
- Sustainability Management Plans.
- IS Rating Support.
- Independent IS Auditing management.
