

COMPLIANCE & AUDITING

CAPABILITY BROCHURE

Navigating Australia's environmental legislation can be complex and challenging. Enveng Group provides expert guidance to help businesses and projects stay compliant with evolving regulatory requirements by minimising risk, avoiding penalties and supporting sustainable operations.

Enveng Group specialises in addressing complex regulatory frameworks for infrastructure, mining and development projects through:

- Clarifying legal obligations.
- Identifying key compliance priorities.
- Enhancing environmental performance metrics.
- Building resilient environmental risk profiles.

Enveng Group is committed to supporting a comprehensive understanding of environmental obligations throughout the tender, design, and planning phases of a project.

Legislative Compliance Offerings

At Enveng Group, we focus on the delivery of robust compliance and auditing systems tailored to support each phase of project development and execution. Our diverse range of services enables us to guide clients through complex regulatory framework with confidence and clarity.

We provide the following:

- Accredited Lead Auditors under ISO14001:2015 & ISO 19011:2018.
- Independent Auditors under EPBC Act.
- Regulatory compliance audits and inspections for works approvals and licences.
- Internal environmental compliance audits (Third Party).
- Due Diligence Audits and Assessments, Environmental Site Assessment, Limited Environmental and Safety Compliance Audits.
- Asbestos and/or contaminated soil disposal inspection and waste management strategies.
- Controlled waste transport, disposal strategies and options assessment.
- Compliance Register Software, including management.
